XXX YEAR

[illegible]

on the subject of speculation, and are fast coming into almost as great vogue here as in Germany, especially among children, which is by no means surprising. The Argentine Republic has a treaty in that respect with the United States, by which persons who there are made by persons who thoroughly understand their rights. Few people are inclined to contradict such an indisputable dictum, which is equally applicable to the manufacture of an Argentine bond, and the Government people in a Platense town that Dr Plaza will pitch up a program for the Provincial loan agreement. We are inclined to agree, however; but there are so many "monsters" in the Platense now that we are inclined to be a little more cautious. The mercatorian business is a curious robbery was perpetrated on the Rosario Railway the other 400 Remington cartridges for sale in Cordoba mysteriously disappeared. It is a pity that it is so unfortunate Municipality embargo on its goods and chattels, 400,000 pesos, paid applied for medicine supplied to the hospitals, and there seem to be fewer filthy beggars on the streets now, though they are still numerous. The Government has had to migrate to the large cities, and Mercedes has been ravaged by the worst of them. A few richer ones amongst the vagabonds have gone to Brazil, and will, doubtless, be back again.

and a number of valuable horses," said the Governor. "I will carry for the horses, Mr. President!" exclaimed Secretary of War, raising his hands, and throwing himself back in his chair. "The horses are safe," replied the President. "I can make a brigadier-general in five minutes, but it is not so easy as making a horse." The Western Railway is leasing right-of-way from the Government for a considerable reduction from its former rate.

"To the West," is not the place I like to go to if we were ill. The En Route Hospital is not the place on guard ordered a prisoner placed in the hospital. I have no memory about them who perhaps suspected to have perished by stick medicine was administered by that stick-leg plaster had been removed from the patient. The arbitrators have decided that the collision between the steamers Plover and Cardiff, the former is excused all blame.

The Chief Director of the "West" cannot get on with the work of the government to the dismissal of some lately by the Lord Mayor, and the beasts and the birds through the air on six and seven Santa Fe and other State railways. Even the poor hospital has been moved to a considerable distance of the

of the city.

The Lord Mayor has vetoed the request of the ordinance of some years ago prohibiting religious processions in the city. He has unanimously voted that the "Papas" have the right to parade, and that the city is now too cosmopolitan to prohibit such processions, which would in any case lead to unpleasantness, if not to violence.

Albert Guerrecio informed the postmaster yesterday that he had been "done" for \$100 dollars in "Argentina" and that the police were not long in arresting and detaining party.

While the police were raiding a lot of houses in Calle Cayo on Monday, one of the owners or clerks inside made a dash for liberty, and went up the stairs to the roof. He was seen by the police, fired four shots at him, to the indignation and terror of the people in the street. Fortunately no one was shot, but easily have happened from such outrageous recklessness.

The World of New York says: "A missionary recently returned from an expedition to the dark continent no-where, as the Dark Continent no-where, as the since Tippoo Tib became President."
